10th pass out with 87%.

Skills:

- **Good knowledge with Mobile Application Development with Java.**
- **Intermediate knowledge in Python,C,C++.**
- **Basic knowledge in Data Structures and algorithms,app development.**

About:

Currently, I am about to finish my final semester/year at college, and in these few years I have been taught many programming languages, software development and testing, worked on various projects, built applications etc.But the practical application knowledge will help me to get to know how much I have learnt and where I stand in today's competitive world. I see this as an excellent opportunity too show my skills, talent and whatever I have learnt which inturn will help me gain more knowledge about how this industry functions, as well as for pursuing my further studies.Hence, this is why you may hire me for this internship.

Personal Projects:

- **Password and Document Manager (Present)**
  - Project in Mobile App Development
- **Clock with stopwatch and Age Calculator**
  - Project in C#
